

Client Project - Nieva Team

React Essential Guide

31 Lessons

4 Modules

Free Access

Daisy Gonzalez - Learning Experience Designer

React.js 18.3

The Challenge

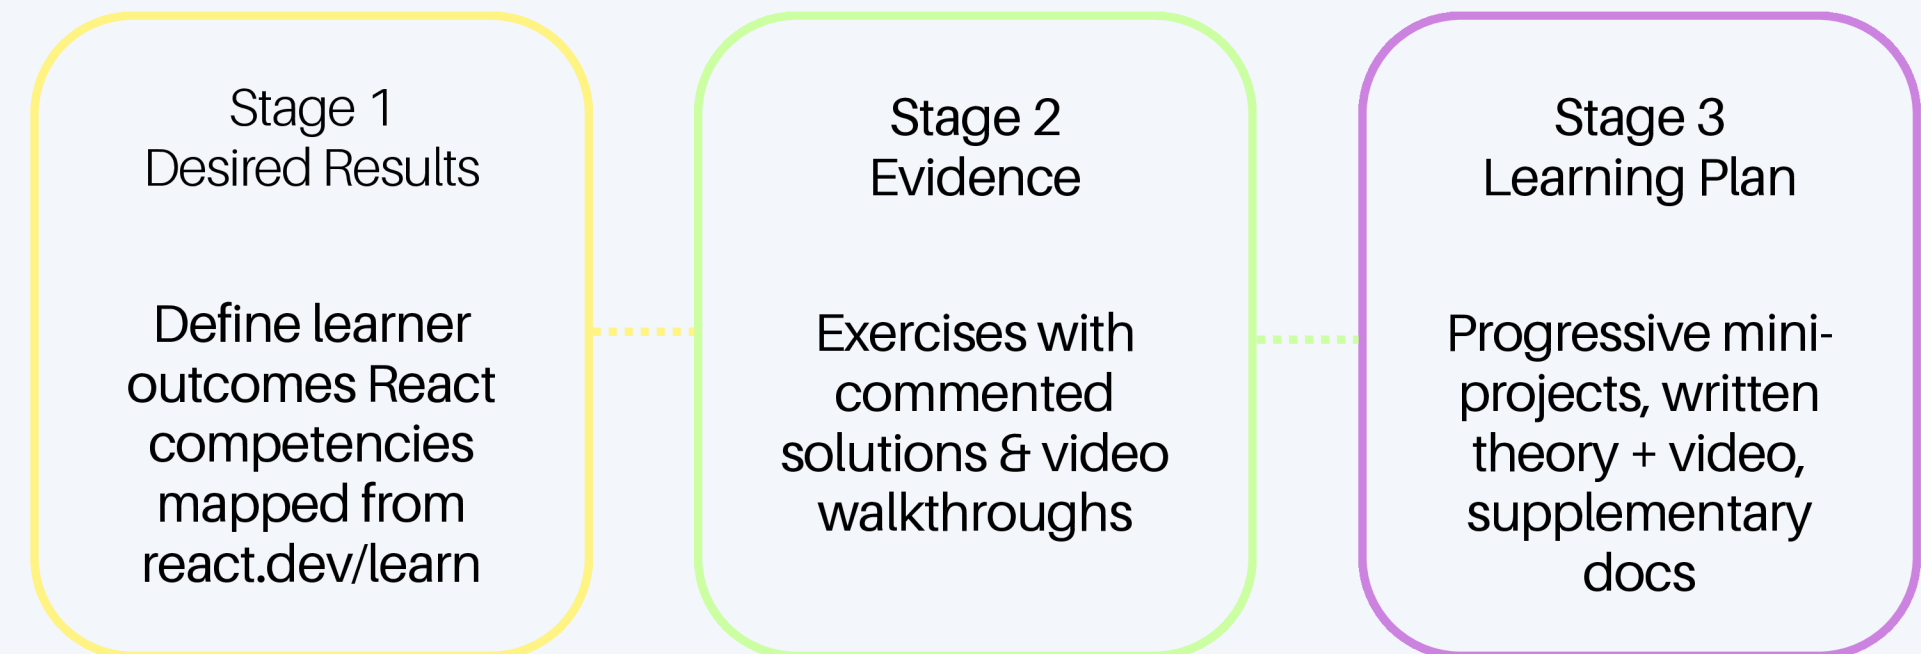

Find a way to make official React.js docs more user-friendly instead of dense & developer-centric

No structured bilingual learning path for Spanish-speaking beginner programmers

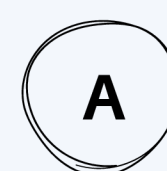

Learners lacked scaffolded practice alongside conceptual content

Deployment & real-world application was absent from existing guides

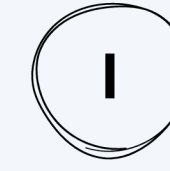

Frameworks Used

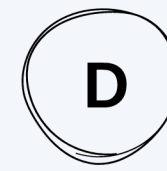

Backwards Design (Wiggins & McTighe)

Analyze React.dev docs, benchmarks and audience JS skills

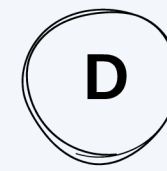

Released on NIEVA platform (BETA)

Structured 4-module curriculum with media mix

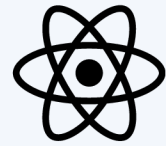

Commented solutions + feedback loop

Written + video + exercises + supplementary

01

Foundations of React

JSX syntax & structure
Functional Components
Props & Component Tree
Rendering & Virtual DOM

02

State & Interactivity

useState Hook
Event Handlers
Conditional Rendering
Forms & Controlled Inputs

Curriculum Architecture

03

Data & Effects

useEffect Hook
Fetching API Data
Context API Basics
Side Effect Patterns

04

Build & Deploy

Project Architecture
Vite Build Tooling
Deployment Workflow
React 19 Preview

Designer Reflections

Backwards Design Mastery

Outcomes-first: learner foals set before a single lesson was written

Multimodal Content Design

Text, video, exercise, and projects combined for varied learning needs

ADDIE Process Applied

Systematic analysis of source docs, iterative design, and evaluation loops baked

Curriculum Expansion

Translated React.dev, added bilingual clarity, deployment, and code improvements

What This Project Demonstrates

EdTech Platform Launch

Delivered as live free course on Nieva Teams Beta platform . Real-world deployment.
